Response to Arguments

Regarding claims 10 and 25, Applicant asserted that the limitation of "a separate

secondary common pilot (SCPICH) according to WCDMA system is transmitted to each

user-specific beam," is supported by the paragraph [0050] in the specification; further

justifying that the support comes from the disclosure in paragraph [0050] of stating that

"a radio channel of each user is separated from other radio channels by user-specific

codes in accordance with code division multiple access CDMA."

Since, Applicant has indicated the support for the claim, the previous rejection is

withdrawn.

Allowable Subject Matter

1. Claims 1-33 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Claims 1, 2, 3, 16, 17, 18, 31, 32, 33 are allowed because the closes prior art,

Number 5,933,466), either singularly or in combination, fails to anticipate or render obvious a method for determining weight factors of antenna beams by selecting weight factors of antenna elements of the antenna array such that the antenna element specific sums of weight factors of a radio cell formed with the antenna array and corresponding weight factors of at least one, second radio cell formed with the same antenna array are at least substantially equal within predetermined limits in order to achieve a predetermined power balance between different antenna elements as defined in the specification (e.g. page 11, [0054]), in combination with all other limitations in the claim(s) as defined by applicant.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
